

AUTO, HOME, RECREATION, UMBRELLA INSURANCE-DENTAL PRACTICE OWNER

We realize you have already purchased your auto, home insurance. However, you may not be satisfied with the service you are receiving or, even more importantly, concerned that your insurance agent has not taken the time to access your risk exposure properly to assure you the coverage you have is proper. Perhaps you purchased directly on-line. While it is easy to buy this way, many times the purchase is done “blindly” not fully understanding your exposures. Our primary goal at **PAIS** is to professionally advise you in the purchase of proper insurance based upon your risk exposure. Because we specialize in providing insurance solutions to the dental professional, perhaps our business model could work better for you.

If you desire **PAIS** to review your current personal auto/home/RV program, we will proceed once you provide us with your current insurance programs and then allow us to do a thorough risk analysis. The risk analysis will include, with your assistance, completing a **questionnaire** to help determine your risk exposure and then proper insurance protection at competitive pricing. During this process, if we find obvious deficiencies with your current insurance program, we will communicate that to you. Once our review is complete, we will attempt to offer you a proposal for coverage. Should you allow **PAIS** to provide your coverage, we will then video record all of your residences....inside and out. This video would be vital in helping you provide an inventory of your loss should a severe loss occur.

If you would like to proceed, contact Dwight Callaham, CIC
